

Accredited Exercise Physiologist
Full Time / Part Time / Casual / Flexible
Multiple Roles

Who we are:

RoboFit is opening our new rehabilitation clinic in Alexandria specialising in bringing neuro-controlled exoskeletons to the community to assist in therapy for individuals with neurological and musculoskeletal conditions including spinal cord injury, stroke, multiple sclerosis and Parkinson's Disease.

Put simply, these active exoskeletons work with a client for posture, balance and gait training or specific joint based therapy. Using emg signals to complete movements. We believe in a holistic approach to combine these devices alongside goal based training.

We are seeking Accredited Exercise Physiologists to join our growing team at RoboFit. We are seeking passionate and motivated team members that ascribe to our team values:

- Never Say Never
- We Win Together
- Spread Joy
- Drive Change
- Pick Up The Broom
- Driven to Climb Mountains

About the Role:

The successful applicant must have ESSA accreditation and be eligible for a Medicare provider number in addition to current first aid and CPR. Proactive new graduates are encouraged to apply as extensive training is provided with neuro controlled exoskeletons, however, ESSA accreditation is essential.

You will work as part of a growing multidisciplinary team working with revolutionary rehabilitative technology that will change the way you approach therapy.

A 2 week training period at our North Wollongong location is required.

Key responsibilities include:

- Managing a clinical caseload of clients under the guidance of a supervisor
- Excellent communication skills and the ability to build rapport with clients, coworkers & other health professionals
- Independently and cooperatively apply professional knowledge and judgement in delivering advanced exercise services in group and individual settings to clients with neurological conditions such as spinal cord injury, stroke, multiple sclerosis and Parkinson's disease
- Apply that same knowledge to conduct initial health and screening assessments to determine a client's suitability for our exoskeleton device and future treatment plans
- Prepare regular reports for external medical and health professionals and funding agencies
- Working with other health professionals to raise awareness of exoskeleton assisted therapies
- Some client administration such as diary management, follow up of enquiries

About You:

To be successful in this application, you will have:

- Exceptional skills in exercise prescription & programming
- Passion for helping others achieve their health and wellbeing goals.
- Ability to organise daily tasks
- Ability to work as part of a team and independently
- Ability to organise exercise programs on individual basis
- A fun & outgoing personality
- Commitment & motivation
- Passion for ongoing learning and progression
- ESSA Accreditation
- Current First Aid & CPR
- Drivers license & reliable car
- Microsoft Office & reporting skills
